Section III Management's Discussion and Analysis

1. Discussion and analysis of business situation

In 2021, Adhering to be guided by Xi Jinping's Thought of Socialism with Chinese Characteristics for a New Era, the company comprehensively carried out the spirit of the important speech of President Xi's inspection of Guizhou, fully implemented the strategic plan of the provincial party committee and the provincial government, followed the requirements of "high-quality development, big-stride forward", focused on "dual-doubling, dual-consolidating and dual-construction" target demanded by the group company, and coordinated the work of epidemic prevention and control, production and operation, reform and development in an integrated manner. In all, the Company has made remarkable and excellent achievements, painted the picture of the era of "five lines" development, stepped onto the new path of development of a high quality and strong industry, and realized a grand start in the "14th Five Year Plan" development.

2. Industry sector situation in the reporting period

See "Industry profile" and "Industry pattern and trend" in this report.

3. Business scope in the reporting period

The Company's main business is the production and sales of Moutai and a series of liquors. The leading product "Kweichow Moutai" is one of the three most famous distilled liquors in the world,

and is also a brand of Chinese Baijiu that embodies national geographical hallmark products, organic foods and national intangible cultural heritages.

The Company's business model is: raw materials acquisition – merchandise production – sales. The acquisition of raw materials is carried out according to the Company's production and sales plan; the production process of products is as follows: yeast making - Chinese Baijiu making – cellaring - blending - packaging; the sales model is as follows: the Company's products are sold through direct sales and distributor channels. Direct sales channels refer to self-operated channels, while distributor channels refer to social distributors, supermarkets, e-commerce and other channels.

4. Analysis of core competitiveness

$\sqrt{\text{Applicable }} \square N/A$

The Company possesses "four core potentials", i.e, unique territorial protection of product origin, irreplicable microbial colonies, unique brewing techniques inherited for generations over a thousand years and long-term cellaring base of high-quality Chinese Baijiu resources. In addition, the company also owns famous brands, outstanding quality, long-standing culture and long history. No significant changes in the core competitiveness of the Company has ever taken place during the reporting period.

5. Business operation briefing for the reporting period

Firstly, the new blueprint has been inspiring. The Company pursued high-quality development for the all situations, formulated the "14th Five Year Plan" development program, confirmed the "five-color-lines" development path, affirmed the "one base and one benchmark" target, comprehensively carried out top-level designs, built a new system of corporate governance, drew a "concentric circle" of dream building for thousands of people, and opened a new chapter of building a high-quality and strong industry.

Secondly, new achievements have accumulated into powerful potentials. The Company has been adhering to the motto of "quality is the soul of lifeline", and established the quality concept of five craftsmanships of the new era, built a "365 quality management system", deeply delved into the "nine series" of Moutai culture. Major projects such as packaging logistics park and Tongminba liquor base in Xishui County were orderly carried forward. Safety and environmental protection management were taken to a new level. The Moutai culture and sports center was brought into use. All these have been building a more solid foundation for a high-quality and strong industry.

Thirdly, the new business performance is remarkable. The Company has achieved a total operating proceeds of CNY 109.46 billion, an increase of 11.71% year-on-year; the total profit is CNY 74.53 billion, a year-on-year increase of 12.59%; the net profit attributable to the owner of the parent company is CNY 52.46 billion, with a year-on-year increase of 12.34%. All indicators have maintained double-digit growth, and the comprehensive strength of the Company has once again reached a new level.

5.1Main business analysis

A.Analysis of accounting item changes related to the income statement and the cash flow statement

Item	Amount in the reporting period	Amount in the same reporting period of last year	YoY Change (%)
Operating proceeds	106,190,154,843.76	94,915,380,916.72	11.88
Operating costs	8,983,377,809.96	8,154,001,476.28	10.17
Sales expenses	2,737,369,434.78	2,547,745,650.95	7.44

General and administrative	8,450,274,065.03	6,789,844,289.39	24.45
expenses			
Financial expenses	-934,523,406.02	-234,610,582.44	N/A
R&D expenses	61,923,213.59	50,398,036.33	22.87
Net cash flows from operating activities	64,028,676,147.37	51,669,068,693.03	23.92
Net cash flows from investment activities	-5,562,445,704.34	-1,805,227,155.72	N/A
Net cash flows from financing activities	-26,564,141,388.96	-24,127,536,908.26	N/A

Causes for the operating proceeds change: mainly due to the increase of sales and the product structure change in the reporting period.

Causes for the operating expense change: majorly due to the sales increase, the production cost increase, and the product structure change in the reporting period.

Causes for the sales expense change: mainly due to the advertising and marketing expense increases for the the Moutai-flavor series liquor in the reporting period.

Causes for the general and administrative expense change: mainly due to employee compensation increase and maintenance cost increase in the reporting period.

Causes for the financial expense change: mainly due to the increase of commercial bank interest income increase in the reporting period.

Causes for the R&D expense change: majorly due to the increase of R&D project increases in the reporting period.

Causes for the Net cash flow change from operating activities: mainly due to the increase of cash received from sales of goods and rendering of services in the reporting period.

Causes for the Net cash flow change from investment activities: mainly due to the increase of cash payment used to buy certificates of deposit in the reporting period.

Causes for Net cash flow change from financing activities: mainly caused by the increase of cash dividend distribution in the reporting period.

Detailed reasons for any significant changes to the business type, profit structure or profit sources of the Company in the reporting period.

- (1) The net increase in customer and interbank deposits is mainly due to the Company's holding subsidiary, Kweichow Moutai Group Finance Co., Ltd. gathered more funds from other member companies of the group company than the previous reporting period.
- (2) The increase in the cash received from other business related activities, is mainly due to the interest income increases from commercial bank deposits in the reporting period.
- (3) The decrease in the net increase in loans and advances to customers, is mainly due to less loan increase was issued by the Company's holding subsidiary, Kweichow Moutai Group Finance Co., Ltd. to the member companies of the group company in the reporting period.
- (4) The decrease in the net increase in lending funds, is mainly due to the due recovery of interbank loans by the Company's holding subsidiary, Kweichow Moutai Group Finance Co., Ltd.
- (5) The increase in the central and interbank deposits is mainly due to the maturity of the fixed term bank deposits deposited by the Company's holding subsidiary, Kweichow Moutai Group Finance Co., Ltd. in the previous reporting period.
- (6) The increase in the cash paid for interests, fees and commissions, is mainly due to the increase of interest payments by the Company's holding subsidiary, Kweichow Moutai Group Finance Co., Ltd. in the reporting period.
- (7) The decrease in the cash received from investment recoveries, is mainly due to the decrease in the cash received from disposal of non-current financial assets in this period.
- (8) The increase in the cash received from investment returns, is mainly due to bond interests receive by the Company's holding subsidiary, Kweichow Moutai Group Finance Co., Ltd.
- (9) The increase in the net cash received from disposal of fixed assets, intangible assets and other long-term assets, is majorly caused by the increase in the cash received from disposal of fixed assets in this period.
- (10) The increase in the cash received from other investing activities, is caused by the increase in the performance bond for basic construction in this period.
- (11) The increase in the cash paid to acquire and construct fixed assets, intangible assets and other long-term assets, is majorly caused by the increase in the land transferring fees in this period.
- (12) The increase in the cash paid for investments, is majorly caused by the purchase of the certificate of deposit in this period.
- (13) The increase in the cash paid for other investing activities, is caused by the increase in the return of the performance bond for basic construction in this period.
- (14) The decrease in the cash paid for other financing activities, is majorly caused by the increase in the cash for purchasing certificate of deposit.
- (15) The increase in the cash paid for other financing activities, is majorly caused by the adjustment regarding the accounting affairs in leasing according to the new leasing principles.
- (16) The decrease in the effect of fluctuation in exchange rate on cash and cash equivalents, is caused by the Company's wholly-owned subsidiary, Kweichow Moutai Paris Trading, whose financial statement of overseas operation has been converted as the foreign currency translation differences in the statement of recording currency.

5.4 Analysis of operating information in the industry

 $\sqrt{\text{Applicable}} \square N/A$

Analysis of operating information in the liquor production industry

A. Industry profile

 $\sqrt{\text{Applicable }} \square N/A$

According to the National Bureau of statistics, the total output of Chinese Baijiu production enterprises in Chinese Baijiu above designated size has reached 7,156.30 million liters in 2021, a slight decrease of 0.59% compared with the same period last year. The sales revenue has reached CNY 603.35 billion, a year-on-year increase of 18.6%; the total profit was CNY 170.19 billion, a year-on-year increase of 32.95%.

B. Production Capacity

Current capacity

√Applicable □N/A

Main Factories	Designed Capacity	Actual Capacity
Chinese Baijiu production workshop of Moutai	42,742.50	56,472.25
Series liquor production workshop	31,660.00	28,248.92

Notes: (1) In the design capacity of 31,660.00 tons of series base liquor, due to the production process characteristics of the series liquor, the design capacity of 6,400.00 tons of series base liquor was placed into operation in November 2021, and the actual capacity would be released in 2022. (2) The company uses the weight unit to measure according to the usual practice. The units of measurement used for production, sales, inventory, and production capacity in this report are all in "tons".

Capacity under Construction

 $\sqrt{\text{Applicable}} \square N/A$

Unit: CNY 10,000

	Planned	Amount	Accumulated
Name of the Capacity under Construction	investment	invested in this	investment
	amount	reporting period	amount
30000 ton Moutai-flavored series liquor	838,400.00	205,273.00	371,273.00
technical renovation project and its			
supporting facilities			

Production capacity calculation standards

 $\sqrt{\text{Applicable }} \square N/A$

In the above "existing capacity" table, the design capacity is calculated according to the production process requirements, combined with the plant specifications and the number of cellars, and the actual capacity is calculated according to the actual base liquor production yield in the reporting period.

C. Inventory at the end of the reporting period

 $\sqrt{\text{Applicable }} \square N/A$

Unit: Ton

	C III. 1 0 II	
Finished liquor	Semi-finished liquor (including base liquor)	
10,282.35	250,463.82	

Note: The finished liquor is the Company's packaged inventory stock (including Moutai-flavor series liquor).

Inventory Impairment Risk Warning \Box Applicable $\sqrt{N/A}$

Product profile

 $\sqrt{\text{Applicable }} \square N/A$

Unit: CNY 10,000

Product grade	Productio n (ton)	Change (%) Same Period	Sales (tons)	Change (%) Same period	Producti on/sales rate (%)	Sales revenue	Change (%) same period	Main representing brand
Moutai	56,472.25	12.42	36,261.31	5.68		9,346,451.21	10.18	Moutai
Other series liquor	28,248.92	13.33	30,177.38	1.46		1,259,477.82	26.06	Moutai Wangzi liquor, Han Moutai-flav ored liquor, Lai Mao liquor

Note: (1) In order to ensure the sustainable development of the Company, a certain amount of base liquor needs to be retained every year. According to the production process, it takes Maotai liquor at least 5 years of cellaring since its production before in can be released from the factory. (2) Moutai is a blend of base liquor of different years, different rounds and different concentrations. It is a perfect combination of technology and art. Therefore, the base liquor of a certain year may appear as a product in the next several years. (3) The Company regards quality as its life, adheres to quality first, adheres to the spirit of craftsmanship, and adheres to the principle of "honoring the principles, abiding by the rules, sticking to the craftsmanship, cellaring enough liquor to age, and not selling young liquor". The production of Moutai is of natural solid-state fermentation, brewed with traditional craftsmanship, and therefore the production yield has certain volatility. (4) Based on the above reasons, the production and sales rate of Moutai base liquor cannot be accurately calculated. The product formation process of series liquor is similar to that of Moutai.

6. Discussion and analysis of the Company's future development

6.1Pattern and trend in the industry

 $\sqrt{\text{Applicable } \square \text{N/A}}$

Pattern and trend. In 2021, the ever-changing situation and the century epidemic situation are intertwined, and the external environment becomes more complex, severe and uncertain. However, the fundamentals of China's long-term economic improvement will not change. The total volume of liquor production and sales has stabilized, and quality and efficiency have been steadily improved. The main trends are as follows: first, the industry will further improve quality and efficiency. In 2021, the Chinese Baijiu enterprises have completed their business income of CNY 603.35 billion, an increase of 18.6% over the same period last year. The total profit was CNY 170.19 billion, a year-on-year increase of 32.95%. The high-quality development of the industry has achieved remarkable results; second, the industrial concentration was further improved. The market share of the industry will continue to concentrate on advantageous brands, advantageous production capacity and advantageous production areas, and the structural growth pattern will exist for a long time; third, the consumption structure was further upgraded. Under the background of common prosperity, disposable income of residents continues to increase. The demand for Chinese Baijiu with high quality will drive the development of high-quality and famous Chinese Baijiu.

Competitive advantage of the Company. First, the Company has "four core potentials" composed of unique geographical protection of origin, non-replicable microbial colony, unique brewing technology inherited for thousands of years and high-quality base liquor resources stored for a long time; Second, the company has large-scale product production and supporting capacity, strong management, technology and marketing team and craftsman team proficient in Chinese Baijiu making, starter making, blending and tasting; Third, as a traditional pillar and characteristic advantage industry in Guizhou Province, local governments have successively introduced various policies to support the development of Chinese Baijiu industry. The external environment of Chinese Baijiu development has been continuously improving, the market competitiveness is outstanding, and brand competitiveness has been leading continuously.

6.2 Development strategy

 $\sqrt{\text{Applicable } \square \text{N/A}}$

During the "14th Five Year Plan" period, the Company will take the overall situation with high-quality development, closely focus on the development goal of "dual-doubling, dual-consolidation and dual-construction" of the group company, unswervingly follow the "five line development path", adhere to the principle that quality is the soul of life, build the two lifelines of ecology and safety, focus on the main business, deeply practice the "five-in-one marketing", make decisions according to the situation, take advantage of the situation, gather strength, and continuously improve product quality, brand value, marketing ability, cultural content and management efficiency to promote high-quality development and make great strides forward.

6.3 Business plan

 $\sqrt{\text{Applicable } \square \text{N/A}}$

In the new year of 2022, the Company will strictly follow the decisions and arrangements of the CPC Central Committee, the State Council, Guizhou Provincial Party Committee and the provincial government, put every effort into the production and operation, reform and development, strive to promote the high-quality development of the company.

This year's business objectives are as follows: first, the total operating proceeds will increase by about 15% compared with the previous year; and the second is to complete the capital construction investment of CNY 6.97 billion. The Board of Directors will focus on the annual targets and tasks, take overall consideration and go all out to do the following key tasks:

First, we will make every effort to ensure high-quality and stable production. Further practice the concept of "quality is the soul of life", establish the new era of quality concept, build and implement the "365" quality management system, adhere to the traditional process, scientific innovation, continue to promote the modernization of Moutai quality management; constantly optimize the production process analysis and judgment system, pay close attention to production process implementation and process management, strengthen scientific research and technology, build and improve the whole industry chain and whole life cycle information platform, support Moutai quality engineering with modern science and technology, and provide strong technical support for sustainable quality and stable production.

Second, we will continue to do a good job in marketing. We will strengthen market coordination, accelerate the optimization and upgrading of product mix, targeted product delivery, and increase market share. We will resolutely crack down on fake and shoddy goods, and maintain market order and stability. Accelerate the application of new anti-counterfeiting technology to provide technical guarantee for Moutai's anti-counterfeiting rights protection. Constantly enrich the brand connotation, enhance the brand characteristics, promote the upgrading of consumption experience, and strive to build Moutai Cultural Experience Hall into a cultural display store, brand image store, drinking experience store and customer service store, so as to continuously provide consumers with higher quality services.

Third, we will continue to deepen reform and innovation. We will carry out a campaign to improve the management of world-class enterprises, continue to improve modern enterprise systems, and systematically improve their governance capacity and level. We will make every effort to reform the marketing system, optimize the distribution of the marketing network, and ensure that the fruits of reform and development will benefit more consumers. We will promote the integrated development of "industry, university and research", introduce professional and technical personnel, deepen cooperation in scientific research projects, accelerate the transformation of innovation achievements, further enhance the independent innovation capacity of enterprises, and provide strong technical and intellectual support for high-quality development.

Fourth, we will promote project construction in an orderly manner. To manage the quality, cost and progress of the whole life cycle projects, start the construction of packaging logistics park; accelerate the construction of 30,000 tons of Moutai-flavor series liquor technical renovation project and 15 liquor warehouses in Zhonghua area; strengthen the overall scheduling and supervision, accelerate the effective disposal of historical "legacy projects", and lay a solid foundation and enhance the sustainability for the sustainable and steady development of Moutai.

Fifth, we will adhere to the red line of safety and environmental protection. We will continue to carry out a three-year campaign to improve work safety, improve the work safety management mechanism, promote the construction of a safety risk control and hidden danger management system, implement smart safety and smart fire protection, improve the professional level of safety management, and enhance the ability of prevention and rescue and relief. Adhere to the ecological priority, green development path, promoting "de-pollution" and "de-carbon" project, strive to build "Mountain-River-Forest-Soil-River-Microbe" life community and green low-carbon circulation industry system, promote the construction of "xi ecological civilization thought practice demonstration base" and build "Chinese Baijiu industry ecological benchmarking enterprise", to protect Moutai survival and development of natural ecological environment.

Sixth, to enhance the level of cultural development. Focusing on the nine aspects of Moutai culture, "people, culture, material, art, ceremony, festival, harmony, history and tool", we will comprehensively excavate, refine, build and enrich Moutai culture. We will plan and hold high-end international wine culture activities, hold traditional cultural activities such as the "Dragon Boat Festival" and "Moutai Festival", launch the compilation of the Chinese Wine Culture Ceremony, and strive to build a key national cultural project. Coordinate service management, standardize brand monitoring and supervision, and strive to establish and improve the corporate culture system in line with their own characteristics.

Seventh, we will strengthen the construction of personnel teams. Focusing on the needs of development, we will cultivate and introduce national and provincial high-level innovative talents, outstanding professional talents and operation and management talents in key areas. We will deepen the "Eight-step craftsman" training system, set up the "Moutai Craftsman Day", and cultivate a group of post-90s skills through versatile craftsmen, including craftsmen, Moutai craftsmen, skill identification, teachers, skill competitions, labor competitions, and "five small" activities. We will continue to increase staff training, smooth the channels for the evaluation and employment of job technology and professional titles, strive to improve the working vision and professional level of technical personnel, establish a talent classification and evaluation system that fits the development of Moutai, and strive to create a good environment to attract talents, love and use talents.

Eighth, we will continue to strengthen our responsibility. We will actively carry out social public welfare activities such as donating money for students and helping the poor, and continue to highlight the image of Moutai charity brand. Continue to optimize the support methods, steadily improve the base support standards, and effectively protect the fundamental interests of farmers; continue to help Daozhen develop advantageous and characteristic industries, drive development by industry, continue to consolidate the achievements of poverty alleviation and rural revitalization, help the economic and social development of the province, and make contributions to promoting common prosperity.

6.4Possible confronting risk \square Applicable $\sqrt{N/A}$ First, the risk of macroeconomic uncertainty; second, the epidemic impact on the consumption demand of Chinese Baijiu; and third, the risk of ecological environment protection; fourth, the risk of intellectual property protection.

6.5 Micellaneous

 \square Applicable $\sqrt{N/A}$

7. The Company's failure to disclose the information and reasons in accordance with the standards due to non-application of the standards or special reasons such as state secrets and trade secrets

 \square Applicable $\sqrt{N/A}$

Section IV Corporate Governance

1. Description of the related situation of corporate governance

 $\sqrt{\text{Applicable }} \square N/A$

In strict accordance with the Company Law, Securities Law, "Governance Standards of Listed Companies" and other laws and regulations and the China Securities Regulatory Commission, Shanghai Stock Exchange, our company issued regulatory documents on corporate governance, combining the actual situation of the company, establish and improve the corporate governance structure, actively promote the optimization of corporate governance structure, standardize the company operation. The company has formulated the relevant rules and regulations, and all the

systems have been effectively implemented. The company has revised and improved the articles of Association, Rules of Procedure of the General Meeting of Shareholders, Rules of Procedure of the Board of Directors and Rules of Procedure of the Board of Supervisors, with clearer rights and responsibilities. The general meeting of shareholders, the board of directors, the board of supervisors and the managers of the company shall perform their own duties and standardize the operation, and the information disclosure of the company should be true, accurate, complete, timely and fair. The board of directors consists of five special committees, including strategy, audit, risk management, nomination, salary and assessment, each of which carries out its work according to its duties. The independent directors expressed their independent opinions in accordance with the regulations and played a full role.

- (1) Situation of the General Meeting of Shareholders. In accordance with the requirements of the Articles of Association and the Rules of Procedure of the General Meeting of Shareholders of the Company, the Company convene the general meeting of shareholders to ensure that all shareholders, especially minority shareholders, enjoy equal status and can fully exercise their rights, and employs legal counsel to issue legal opinions on the general meeting of shareholders. In 2021, the company held two general meetings of shareholders, deliberated and passed 15 motions, and all the resolutions were carefully implemented.
- (2) Situation of the Board of Directors. At present, the board of directors of the company is composed of 6 directors, among which 3 are independent directors and 1 is a staff director. The board of directors should meet the requirements of laws and regulations. The board of directors of the company has five special committees: strategy, audit, risk management, nomination, salary and assessment. Each committee has a clear division of labor, clear rights and responsibilities, and effective operation. All the directors of the company can proceed from the interests of the company and all shareholders, perform their duties in good faith, loyalty, diligence, professional and due diligence, and earnestly safeguard the legitimate rights and interests of the company and all shareholders.
- (3) Situation of the Board of Supervisors. At present, the board of Supervisors of the company is composed of 3 supervisors, one of whom is an employee supervisor. The composition of the board of supervisors meets the requirements of laws and regulations. The Board of Supervisors of the Company shall be diligent and responsible, exercise the function of supervision and inspection in the spirit of responsibility to shareholders, supervise the company's financial situation and operation, related transactions and the performance of duties of senior management personnel, and safeguard the legitimate rights and interests of the Company and all shareholders.
- (4) Situation of controlling shareholders and listed companies. The controlling shareholder shall exercise the rights of the investors and assume their obligations in strict accordance with the requirements of the Company Law. The company has independent business and independent operation ability. The controlling shareholders and the listed company have achieved independent business, personnel, assets, institutions and finance. The board of directors, board of supervisors and internal institutions of the company all operate independently to ensure that the company's major decisions are independently made and implemented by the company.
- (5) Company information disclosure. The Company discloses relevant information in strict accordance with laws, regulations, the Articles of Association and the Information Disclosure Management Measures of the Company truly, accurately, completely, timely and fairly, and ensures that all shareholders and other stakeholders can have equal access to the Company information. During the reporting period, the company disclosed 30 interim announcements and 4 periodic reports.
- (6) Related party transactions. Related party transactions between the Company and its controlling shareholder China Kweichow Moutai (Group) Liquor Co., Ltd. and other related parties, these related transactions are to ensure the normal production and operation and business, the specific content through relevant agreement, and perform the legal procedures, follow the principle of openness, fairness and justice, there is no adverse effect on the company operation.

- (7) Internal control and construction situation. During the reporting period, the company continued to carry out internal control related work in accordance with the requirements of the Basic Standards for Enterprise Internal Control, continued to promote the internal control construction, evaluation, audit and other related work, ensure the realization of the company's internal control objectives, and further improve the level of corporate governance.
- (8) The formulation and implementation of the registration and management system of insider. In accordance with the relevant provisions of the CSRC and the Shanghai Stock Exchange, the Company has formulated the Registration and Management System for Company Insider. The company has strictly implemented relevant systems, registered and filed insider information in accordance with the regulations, further standardized the management of insider information, done a good job in the confidentiality of insider information, safeguarded the principles of openness, fairness and justice of information disclosure, and protected the legitimate rights and interests of the general investors.

Whether there are significant differences between corporate governance and laws, administrative regulations and the CSRC regulations on the governance of listed companies; if there are any major differences, the reasons shall be explained $\sqrt{Applicable} \ \Box N/A$

2. The specific measures taken by the controlling shareholders and actual controllers of the company to ensure the independence of the company's assets, personnel, finance, institutions and business, as well as the solutions, work progress and follow-up work plans that affect the independence of the company work progress and follow-up work plans that affect the independence of the company

Section V Environment and Social Responsibility

1. Environmental information situation

1.1 Environmental information of the company and its major subsidiaries that are key emission units announced by the environmental protection authorities

 $\sqrt{\text{Applicable}} \quad \Box \text{N/A}$

A. Emission information

 $\sqrt{\text{Applicable}} \quad \square \text{N/A}$

- (1) Main pollutants: waste water, waste gas, solid waste.
- (2) Name of characteristic pollutants: COD, ammonia nitrogen, sulfur dioxide, nitrogen oxides, smoke (dust).
- (3) Emissions of pollutants from January to December 2021.
- (1)Wastewater

The company has five wastewater treatment plants, each with one outlet, located in the old factory area and Zhonghua area of the company's headquarter, and the Dadi area, Xinzhai area and Erhe area of Heyixing Liquor Branch, with direct discharge of wastewater after treatment to standards.

	COD		Ammonia nitrogen

3 Solid waste disposal

The company's solid waste lees, waste cellar sludge and waste yeast are handed over to Kweichow Moutai (Group) Circular Economy Industrial Investment and Development Co., Ltd. and other units for comprehensive utilization and disposal, while domestic waste is entrusted to third-party units for transportation to waste incineration power plants for incineration.

(4) Total approved emissions

The company has declared and obtained the emission permit according to the "Management Measures of Emission Permit (for Trial Implementation)" and related requirements. The total approved emissions for the reporting period are: COD 60.097 tons; ammonia nitrogen 6.0097 tons; nitrogen oxides 203.8662 tons; sulfur dioxide and (powder) dust in accordance with Table 2 of the *Emission Standards for Boiler Air Pollutants* (GB13271-2014).

B. Construction and operation of pollution prevention facilities

 $\sqrt{\text{Applicable}} \square N/A$

Wastewater pollutant control facilities are mainly sewage treatment plants and other equipment facilities, whose construction has been completed and in normal operation; the company began to implement the boiler "coal to gas" project in 2011, and completed the comprehensive transformation in 2014, eliminating the coal-fired boilers and building 33 gas boilers, which are now in normal operation.

C. Environmental Impact Assessment of Construction Projects and Other Administrative Permits for Environmental Protection

 $\sqrt{\text{Applicable}} \square N/A$

- (1) The company carried out environmental impact assessment for new, reformed and expanded projects in accordance with the law and obtained 3 approvals for administrative permits for environmental impact assessment in 2021.
- (2) Environmental protection inspection and acceptance of completed projects have been carried out in accordance with the law and 5 online recordings have been completed.

D. Emergency response plan for environmental emergencies

 $\sqrt{\text{Applicable}} \square N/A$

According to the *Management Measures for the Filing of Emergency Response Plans for Enterprises and Institutions* (for Trial Implementation) (Huanfa [2015] No. 4) and other relevant documents, the Company's plants (Old Plant Area/Zhonghua area), and Heyixing Wine Branch (Dadi Area, Xinzhai Area and Erhe Area) have prepared emergency environmental response plans and obtained filing forms from environmental protection authorities, and conducted emergency response drills for emergency environmental events in July 2021.

E. Self-monitoring environmental program

 $\sqrt{\text{Applicable}} \square N/A$

According to the *Measures for Environmental Information Disclosure by Enterprises and Institutions* (Ministry of Environmental Protection Decree No. 31), *Self-monitoring Technical Guide for Emission Units Wine and Beverage Manufacturing* (HJ1085-2020), *Self-monitoring Technical Guide for Emission Units Thermal Power Generation and Boilers* (HJ820-2017) and *Self-monitoring Technical Guide for Emission Units General Rules* (HJ819-2017) and other documents, in order to grasp the status of pollutant emissions from our enterprise and its impact on the surrounding environment quality, fulfill our legal obligations and social responsibilities, we have developed a self-monitoring program to ensure that our self-monitoring meets the requirements of environmental management.

F. Administrative penalties for environmental issues during the reporting period

 \square Applicable $\sqrt{N/A}$

G. Other environmental information that should be made public

□Applicable √ N/A

1.2 Environmental information of the company other than key emission units

□Applicable √ N/A

1.3 Relevant information conducive to ecological protection, pollution prevention and control, and environmental responsibility fulfillment

 $\sqrt{\text{Applicable}} \square N/A$

The company adheres to the road of green development. Focusing on the construction requirements of "one base, one benchmark", the company has linked up with Tsinghua University's Academy of Environmental Sciences and other scientific research institutions to further clarify the direction and path of Maotai's green development. We have launched researches on ecological capacity, pollution control capacity improvement, and the layout of "the Production, Living and Ecological Space". We have implemented "five special projects", such as water enhancement project, gas enhancement project, soil consolidation project, micro-protection project and comprehensive monitoring and evaluation project of ecosystems, and carried out "five special actions", such as energy-saving, carbon reduction and efficiency improvement action, green product design action, green transformation action of industrial chains, green science and technology innovation action and green low-carbon life action. Our environmental protection work focuses on "gas, water, slag, green, carbon" and other aspects, constantly building facilities, optimizing mechanisms, strengthening supervision and making guarantees to effectively protect the ecological environment on which Maotai depends for its survival and development.

The company actively integrates into the development of Guizhou's "National Ecological Civilization Pilot Zone" initiative, carries out ecological protection of the Chishui River with utmost efforts, and solidly promotes ecological construction. Since 2014, the company has decided to contribute CNY 500 million annually, specifically for the ecological protection of the Chishui River basin. In addition, buffer zones and no-construction zones for medium and long-term ecological environmental protection are planned for Maotai, and greening and restoration of the barren slopes on the west bank of the Chishui River are also planned. Meanwhile, the company will make every effort to promote regional ecological environmental protection legislation, making "water, air, soil, microorganisms, cultural heritage, and

planning and construction" as key legislative protection objects to better protect the irreproducible ecological environment.

1.4 Measures taken to reduce its carbon emissions during the reporting period and their effects $\sqrt{\text{Applicable}}$ $\square N/A$

First, carry out ecological restoration and greening beautification. In 2021, the company made efforts to improve the regional environment by carrying out bare soil treatment, vigorously implementing greening projects, organizing employees to participate in forest protection and greening activities, planting an area of about 1,430,000 square meters, adding 160,000 square meters of greening to the plant area, with a total greening area of about 1.43 million square meters, as well as investing to complete the landscape greening of the wine making and starter-making workshops in Zhonghua area during the Thirteenth Five-Year Plan. We established a positive and negative list of regional plants, gradually reducing exotic tree species and effectively protecting the native environment; second, actively promoted vehicle exhaust treatment. Our commuter vehicles are gradually replaced with natural gas vehicles, the single and double number restrictions on employee vehicles are implemented and gradual replacement with new energy vehicles is encouraged. In this way, our factory areas can reduce exhaust emissions by 120 million m ³per year and achieve an excellent air quality rate of over 98%.

2. Social Responsibility Work

 $\sqrt{\text{Applicable}} \square N/A$

For details, please refer to our "Social Responsibility and ESG Report 2021" disclosed on the website of Shanghai Stock Exchange (URL: www.sse.com.cn) at the same time as this report.

3. Specific work on consolidating and expanding the progress in poverty alleviation and rural revitalization

 $\sqrt{\text{Applicable}} \square N/A$

In 2021, the company always adhered to the guidance of Xi Jinping's Thought on Socialism with Chinese Characteristics for a New Era, deeply implemented the spirit of the important speech by General Secretary Xi Jinping during his inspection of Guizhou, conscientiously implemented the spirit of the national and provincial summing-up and commendation conferences on poverty alleviation, and strictly followed the requirements of "four no-takes", taking the consolidation of poverty alleviation and rural revitalization progress as important political tasks and striving to fulfill our social responsibilities. 3.1 Work Progress

A. Help build and strengthen the work team. First, select and enhance the strength of the support team. The company has further promoted and appointed comrades with excellent performance and outstanding achievements in support and assistance, so as to stimulate the motivation and dedication of cadres and staff. In accordance with the requirements, we have selected and sent outstanding young cadres to the front line of Daozhen town as the first secretary, cadres and helpers, thereby strengthening the team of helpers, and successfully completing the rotation of villages in rural revitalization in 2021. Second, strict team management. In order to strictly manage the work, the company has formulated management methods for the help team in Daozhen, promoting the implementation of help work by clarifying work responsibilities and strengthening daily management. Third, explore new paths of talent cultivation. We have conducted mutual posting of affiliated cadres with Chishui City to train and reserve talents for promoting project construction, playing a leading role in party building and promoting tourism industry development. Fourth, strengthen agricultural technology guidance. We worked together with Daozhen County Agricultural and Rural Bureau to organize township agricultural service center leaders and growers for "training sessions on sorghum cultivation", systematically teaching sorghum seedling transplanting, pest control, harvesting and storage to further enhance the technical reserves and planting confidence of farming-related cadres and growers.

B. Help solidify the industrial base. First, optimize the construction of raw and auxiliary material bases. Combined with the development needs to strengthen the construction of raw and auxiliary material bases, the company has invested in deepening the construction of sorghum demonstration bases, optimizing the base construction of raw and auxiliary materials such as rice straw, wheat, etc. The areas

cover Renhuai, Xishui, Congjiang and many other counties or cities, promoting the transition of traditional agriculture to industrialization and specialization of modern agriculture in poverty-alliviated areas, thereby driving nearly 100,000 households of farmers to increase income. Second, focus on the development of edible mushroom industry. Based on Daozhen's industrial positioning of "a vegetable and mushroom township", we have mobilized dealers to donate funds to help the development of Daozhen's edible mushroom industry, and join hands with the county government to promote the scale, quality and branding of Daozhen's edible mushroom industry by centering on our assistance goal of helping Daozhen build the edible mushroom industry. Third, deepen the cooperation mode with the guaranteed vegetable base in Renhuai City. We purchased vegetables in poverty alleviated areas in the procurement mode of "farmers + guaranteed bases (cooperatives) + canteens" to realize industrialized employment in local places for poverty-alleviated population.

C. Continue to strengthen education support. First, we invested a total of CNY 100 million in 2021, to solve the "last mile" problem from home to university for nearly 20,000 students by focusing on "education support" through the "China Maotai - the backbone of the country" public welfare project. Second, a public welfare project of "Dream Libraries" and a reading program for rural children were launched, covering five schools in Daozhen County, gathering positive energy for the revitalization of rural culture. Thirdly, we coordinated to build a civic education base and a remote education station for rural revitalization in Daozhen County, helping to build a talent team in the poverty-alleviated areas and enhancing the development momentum of the areas themselves.

D. Expand the consumption channels of agricultural products. First, strengthen the top design. The company's support team in Daozhen organized a "meeting to promote Daozhen goods out of the mountain", systematically sorting out the problems in Daozhen's agricultural and sideline products, production, packaging and sales, as well as providing scientific advice and suggestions to promote Daozhen goods. Second, give full play to the assistance of consumption. Through internal purchase, social forces and other ways to increase the purchase of agricultural and sideline products in poverty-alleviated areas of Daozhen County and Renhuai City. In 2021, the completion of direct procurement of high-quality agricultural products amounted to more than CNY 48 million, apart from coordinating social forces to help Daozhen's sales of high-quality agricultural products. Third, create a well-known brand. We helped coordinate Daozhen's agricultural and sideline products into the Jingdong Group, the RT-Mart and other online and offline platforms, recommending Daozhen's agricultural and sideline products through company activities or publicity media to enhance its brand influence.

3.2 Next work plan

First, continue to thoroughly implement the guiding opinions and arrangements of the Party Central Committee and the provincial government on consolidating and expanding the progress in poverty alleviation and rural revitalization, and make every effort to promote the implementation of the work. Second, further strengthen the study of policies related to rural revitalization, understand the spirit of the documents and formulate effective measures to strengthen work coordination and to improve the mechanism of coordination between departments. Third, continue to play the advantage of Maotai's resources. Fully implement the "Implementation Opinions of Maotai on Playing the Function of State-owned Enterprises to Achieve Rural Revitalization and Agricultural and Rural Modernization", and effectively carry out practical projects, so that the fruits of development can benefit wider areas and more people. Fourth, in accordance with the deployment of higher-level work, implement our support for the pilot construction of beautiful red villages. Fifth, further strengthen the foundation of social livelihood. Continue to deepen the "1+10+1" system of advancing rural revitalization by party building, coordinate grass-roots party organizations to understand the situation of assisting villages in a timely manner, and try to support the development of industries, education and medical care, while actively guiding social forces to join the Daozhen support team and strengthen the helping force, so as to consolidate the progress in poverty alleviation and promote the comprehensive rural revitalization.

3. Company Profile

3.1 Company Overview

√applicable □Non-applicable

Kweichow Moutai Co., Ltd. is established after being approved by Guizhou Provincial People's Government in its document of (1999) No. 291, Reply on Approving the Establishment of Kweichow Moutai Co., Ltd.. As an incorporated company, its main promoter is China Kweichow Moutai Distillery (Group) Co., Ltd., with Kweichow Moutai Distillery (Group) Technology Development Co., Ltd., Guizhou Textile Collective Industry Association, Research Institute of Tsinghua University in Shenzhen, China National Research Institute of Food and Fermentation Industries, Beijing Sugar Tobacco & Wine Group Co., Ltd., Jiangsu CANDY & WINE & TOBACCO Parent Co., Shanghai Jieqiang Tobacco Sugar & Wine (Group) Co., Ltd. as co-founders.

The company was established on November 20,1999. Its registered capital at its establishment was CNY 185 million. After being approved by CSRC with the document of [2001] No.41 and Ministry of Finance with the document of [2001] No. 56, the corporation publicly offered 71,500,000 A shares (including 6,500,000 state-owned shares) at Shanghai Stock Exchange on July 31, 2001, marking a total capital of its shares at 250,000,000 shares. On August 20, 2001, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the plan of profit distribution and converting capital reserves into share capital audited and approved by the 2001 Annual General Meeting, the corporation set the total share capital at the end of 2001- 250,000,000 shares as the baseline, and distributed dividends (CNY 6 every 10 shares, tax inclusive) to all shareholders, and converted capital reserves into increased share capital at a 10:1 ratio, totally increasing 25,000,000 shares. After this profit distribution, the total capital share increased from 250,000,000 shares to 275,000,000 shares. On February 13, 2003, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the plan of profit distribution audited and approved by the 2002 Annual General Meeting, the corporation set the total share capital at the end of 2002- 275,000,000 shares as the baseline, and distributed dividends (CNY 2 every 10 shares, tax inclusive) to all shareholders. With the same baseline, the corporation distributed bonus shares (1 bonus share every 10 share) to all shareholders. After this profit distribution, the total capital share increased from 275,000,000 shares to 302,500,000 shares. On June 10, 2004, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the plan of profit distribution and converting capital reserves into share capital audited and approved by the 2003 Annual General Meeting, the corporation set the total share capital at the end of 2003- 302,500,000 shares as the baseline, and distributed dividends (CNY 3 every 10 shares, tax inclusive) to all shareholders, and converted capital reserves into increased share capital at a 10:3 ratio. After this profit distribution, the total capital share increased from 302,500,000 shares to 393,250,000 shares. On June 24, 2005, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the plan of profit distribution and converting capital reserves into share capital audited and approved by the 2004 Annual General Meeting, the corporation set the total share capital at the end of 2004- 393,250,000 shares as the baseline, and distributed dividends (CNY 5 every 10 shares, tax inclusive) to all shareholders, and converted capital reserves into increased share capital at a 10:2 ratio. After this profit distribution, the total capital share increased from 393,250,000 shares to 471,900,000 shares. On January 11, 2006, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the *Reform Plan of Equity Division of Kweichow Moutai Co., Ltd. (Revised Version)* audited and approved by the second provisional General Meeting and the Meeting of relevant shareholders, the corporation set the total share capital at the end of 2005- 471,900,000 shares as the

baseline, and converted every 10 capital reserves into 10 increased share capital. After this profit distribution, the total capital share increased from 471,900,000 shares to 943,800,000 shares. On November 17,2006, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the 2010 annual plan for profit distribution audited and approved by the 2010 Annual General Meeting, the corporation set the total share capital at the end of 2010- 943,800,000 shares as the baseline, and distributed dividends (CNY 23 every 10 shares, tax inclusive) and bonus share (1 bonus share for every 10 shares) to all shareholders. After this profit distribution, the total capital share increased from 943,800,000 shares to 1,038,180,000 shares. On October 27, 2011, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the 2013 annual plan for profit distribution audited and approved by the 2013 Annual General Meeting, the corporation set the total share capital at the end of 2013- 1,038,180,000 shares as the baseline, and distributed dividends (CNY 43.74 every 10 shares, tax inclusive) and bonus share (1 share every 10 shares) to all shareholders. After this profit distribution, the total capital share increased from 1,038,180,000 shares to 1,141,998,000 shares. On August 5, 2014, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

According to the 2014 annual plan for profit distribution audited and approved by the 2014 Annual General Meeting, the corporation set the total share capital at the end of 2014-1,141,998,000 shares as the baseline, and distributed dividends (CNY 43.74 every 10 shares, tax inclusive) and bonus share (1 share every 10 shares) to all shareholders. After this profit distribution, the total capital share increased from 1,141,998, 000 shares to 1,256,197,800 shares. On October 29,2015, the corporation completed registration for alternation of registered capital from Administration for Industry& Commerce of Guizhou Province.

The corporate's business scope includes: production and marketing of Moutai wine and wines of series, production and marking of beverage, food and package materials, the development of anti-counterfeit technology and the research and development of IT-related products, the service of management of hotel, housing, catering, entertainment, bath and parking lot, and vehicle transporting (dangerous chemicals not included) and maintenance.

3.2 Scope of consolidated financial statements

√applicable □Non-applicable

This year, eight subsidiaries were included in the consolidated financial statement, including Guizhou Moutai Chiew Import And Export Co., Ltd., Guizhou Xijiu Sales Co., Ltd., Kweichou Moutai Group Finance Co., Ltd., Moutai Custom Marketing (Guizhou) Co., Ltd., Beijing Friendship Messenger Trading Co., Ltd., Kweichow Moutai Paris Trading, Guizhou Laymau Wine Industry Co., Ltd. and Kweichow Moutai-Flavor Liquor Marketing Co., Ltd.

4. Basis of preparation of financial statements

4.1 Basis of preparation of financial statements

The company has prepared its financial statements on a going concern basis.

4.2 Going concern

√applicable □non-applicable

Since the date of this report, there are no events resulting in significant uncertainties over going concern of the operation of this company for at least 12 months.

5. Significant accounting policies and accounting estimates

Specific accounting policies and accounting estimates:

√applicable □non-applicable

5.1 Statement of compliance with accounting standards for business enterprises

The financial statements have been prepared in accordance with the requirements of accounting standards for business enterprises, which truly and completely reflect the Company's financial status, operating results, changes in shareholders' equity, cash flow and other relevant information.

5.2 Accounting period

The accounting year of the Company is from 1 January to 31 December.

5.3 Operating cycle

√applicable □non-applicable

The Company sets 12 months as an operating cycle.

5.4 Reporting Currency

The Company's functional currency is CNY.

5.5 Accounting treatments of "Business combination involving entities under common control" and "Business combination involving entities not under common control"

√applicable □non-applicable

(1) Business combination involving entities under common control

For business combination involving entities under common control, assets and liabilities obtained by the combining party through business combination shall be measured at the book value of the combined company at the combination date. The capital reserve (stock premium or capital premium) is adjusted according to the difference between the book value of net asset acquired through combination and the book value of consideration paid for the combination (or total par value of shares issued). If the capital reserve (stock premium or capital premium) is insufficient to offset, the retained earnings shall be adjusted.

(2) Business combination not under common control

For business combination involving entities not under common control, the combination cost is calculated at fair value of the assets, liabilities incurred or assumed and the equity securities issued by the combining party on combination date in the purpose of gaining the combined party's control. For business combination involving entities not under common control that are achieved step by step in multiple exchanges and transactions, different approaches in accounting treatment are adopted for individual financial statements and combination financial statements as follows.

A. For individual financial statements, the initial investment cost of the investment is calculated as the sum of the book value of the combined party's equity investment held by the combining party before the combination date and the increased investment cost on the combination date. If the combined party's equity held by the combining party entails other comprehensive profits, then the profits (e.g. the part of the difference of fair value of saleable financial assets that is calculated in capital reserves, the same for the follows) shall be calculated as the investment profits of the current period.

B. For combination financial statements, the combined party's equity held by the combining party before the combination date shall be recalculated in fair value of the equity on combination date. The margin of its fair value and book value shall be calculated into the investment profits of the current period. If the combined party's equity held by the combining party entails other comprehensive profits, then the profits shall be calculated as the investment profits of the current period of the combination date. Fees, commissions, and other transaction expenses and other relevant administration expense paid for combination shall be calculated into current profits or losses as they occur. Transaction fees of equity securities and debt securities paid by the combining party for combination consideration shall be included in the initial measurement amount of equity or debt securities. The Company shall recognize the difference of the combination costs in excess of the fair value of the net identifiable asset acquired from the acquiree through combination as goodwill. After the review, if the combination costs are still in short of the fair value of the net identifiable asset acquired from the acquiree through combination, include the difference in the current profits or losses.

5.6 Base of consolidated financial statements

√applicable □non-applicable

The combination financial statements of the Company comply with 'Norms for Enterprise Accounting No.33- Combination Financial Statements' and relevant regulations. At combination, all major internal transactions and businesses within combination rage have been offset. The subsidy's shareholder's equity that is not owned by the parent company shall be listed individually in the shareholder's equity item in the combination financial statements as minor shareholder equity. When composing combination financial statements, necessary adjustments shall be made according to the Company's accounting policies and accounting period if the accounting policies and accounting period of the subsidiary corporation is different from those of the Company. For subsidiary corporations acquired by combination under common control, their operating results and cash flow shall be included in the financial statements. The statement entity formed after the combination remains since the ultimate controlling part takes control. For subsidiary corporations acquired by combination not under common control, their operating results and cash flow shall be included in the financial statement since the Company takes control.

5.7 Cash and cash equivalents

Cash equivalents include Cash on hand, Bank balances, other monetary funds, provision at central bank retrievable at any time, deposits with other banks, placements with banks, buying securities and return sale within the same industry and other investments featuring short investment period (generally due within three months since purchase), high mobility, easy convertibility to cash with known amount and low risk of value change.

5.8 Foreign operations and foreign currency translation

√applicable □non-applicable

(1) Foreign currency operations

The amount in the foreign currency shall be translated into CNY currency according to the middle rate of exchange rate in foreign currency market on the day of transaction. At the end of the period, the balance of monetary foreign currency account shall be translated into CNY currency according to the middle rate of exchange rate at the end of the period. The difference between the translated CNY balance and the original book balance shall be calculated as exchange gains or lost, and recorded into items like 'finance expense' and 'construction in progress'. For non-monetary foreign currency projects calculated with historical cost, the spot exchange rate on transaction day is employed, and the amount of reporting currency stay unchanged.

(2) Foreign currency translation

Assets and liabilities in the balance sheets shall be translated at the spot exchange rates on balance sheet date. Shareholders' equity items, except for the item of "undistributed profits", are translated at the spot exchange rates on the dates when the transactions occur. Revenue and expense items in the income statement are translated at the spot exchange rates on the dates when the transactions occur or at the exchange rate determined in a systematical and reasonable method and similar to the spot exchange rate on the day when the transactions occur. Differences arising from the above translations of foreign currency financial statements are separately listed under other comprehensive income in the consolidated balance sheet. Cash flow projects operated overseas shall be translated at approximate exchange rate of spot rate on the date of cash flow. The amount of cash affected by fluctuations of exchange rate shall be separately listed in the table of cash flow.

5.9 Financial instruments

√applicable □non-applicable

(1) Recognition and derecognition of financial instruments

When the Company becomes a party to a financial instrument contract, the related financial asset or financial liability should be recognized. Transaction of financial assets by regular means shall be recognized and derecognized according to accounting on transaction date. Regular means refers to gaining or giving financial assets within the time period designated by law or regulations according to contract items. Transaction date refers to the date that the Company promises to purchase or sell financial assets.

Derecognition of financial assets (or part of financial assets) shall be conducted- written off from the account and asset liability list, if it meets following conditions: A. expiration of the right to acquire cash flow of financial assets; B. Transfer of the right to obtain cash flow of financial assets, and (a) substantively transferring almost all risks and rewards of the possession of financial assets, or (b) though substantively neither transferring nor retaining almost all risks and rewards of the possession of financial assets, relinquishing the control over the financial assets.

(2) Classification and measurement of financial assets

Based on the business model of financial asset management and the contract cash flow characteristics of financial assets, the Company classifies financial assets into: financial assets measured at amortized cost; financial assets measured at fair value with their changes included into other comprehensive income; and financial assets measured at fair value with their changes included into current profits/losses. The following measurement of financial assets depends on its classification.

A. Financial assets measured at amortized cost

The business model in which the Company manages financial assets measured at amortized cost aims to receive contract cash flow. Furthermore, the characteristics of the contract cash flow of such financial assets are consistent with basic borrowing and lending arrangements, which means that cash flow generated on a specific date serves only as payment for principal and interests based on the amount of unpaid principal. The Company adopts the effective interest method for such financial interests, performs subsequent measurement of them at amortized cost, and includes the gains or losses from derecognition, changes or impairment of them into current profits/losses.

B. Financial assets at fair value at fair value through other comprehensive income

The financial assets that meet the following conditions are of this category: The business model in which the Company manages such financial assets both aims to receive contract cash flow and for the purpose of sale; furthermore, the characteristics of the contract cash flow of such financial assets are consistent with basic borrowing and lending arrangements. The Company measure such financial assets at fair value and include their changes into other comprehensive income, but record impairment losses or gains, exchange gains or losses and interest income calculated in the effective interest method into current profits/losses.

C. Equity instrument investments at fair value at fair value through other comprehensive incom

The Company irrevocably chooses to designate part of non-transactional equity instrument investments as financial assets calculated with fair value whose changes are included in other comprehensive income, and only relevant dividend income is calculated into current profits or losses. Changes in fair value are recognized as other comprehensive income. When the financial asset is derecognized, cumulative gains or losses should be transferred into retained earnings.

D. Financial assets at fair value at fair value through current profits/losses

For financial assets other than the above financial assets measured at amortized cost and financial assets measured at fair value with their changes included into other comprehensive income, the Company classifies them as financial assets measured at fair value with their changes included into current profits/losses. In addition, at the initial recognition, the Company specifies partial financial assets as financial assets measured at fair value with their changes included into current profits/losses, in order to eliminate or substantially reduce accounting mismatch. For such financial assets, the Company performs subsequent measurement using fair value and records changes in the fair value into current profits/losses.

When and only when the Company changes its business mode for management of financial assets, will be influenced relevant financial assets be reclassified. For financial assets measured at fair value with their changes included into current profits/losses, relevant transaction fees are calculated into current profits or losses; while for other financial assets, relevant transaction fees are included into the initial recognition amount.

(3) Classification and measurement of financial liabilities

At their initial recognition, financial liabilities are divided into financial liabilities measured at amortized cost and financial liabilities measured at fair value with their changes included into current profits or losses.

Financial liabilities meeting the following conditions are specified as financial liabilities measured at fair value with their changes included into current profits or losses at initial measurement: (A) The specification can eliminate or notably reduce account mismatch; (B) Based on risk management or investment strategy from official documents, management and business evaluation are conducted on financial liability combination or financial asset and financial liability combination on the basis of fair value, which are reported to key management personnel inside the company; (C) The financial liabilities include embedded derivatives that need to be separated.

The Company recognize the classification of financial liabilities at initial recognition. For financial liabilities measured at fair value with their changes included into current profits or losses, relevant transaction fees are calculated into current profits or losses; while for other financial liabilities, relevant transaction fees are included into the initial recognition amount.

The subsequent measurement of financial liabilities depends on its classification:

A. Financial liabilities measured at amortized cost

For financial liabilities of this category, effective interest rate is adopted, and subsequent measurement is performed at amortized cost.

B. Financial liabilities measured at fair value with their changes included into current profits or losses

Financial liabilities measured at fair value with their changes included into current profits/losses include trading financial liabilities (including derivatives classified as financial liabilities) and the financial liabilities specified to be measured at fair value with their changes included into current profits/losses at the initial recognition.

(4)Offsetting of financial instruments

Financial assets and financial liabilities meeting the following conditions simultaneously shall be listed in balance sheet in their net amounts after manual offset: The Company has the legal right to offset recognized financial assets and financial liabilities and may execute the legal right currently and simultaneously; The Company plans to settle or simultaneously encash the financial assets in net amounts and pay off the financial liabilities.

(5)Impairment of financial assets

For financial assets measured at amortized cost and debt instrument investment measured at fair value with its changes included into other comprehensive income, the Company recognizes the provision for loss based on the expected credit loss.

When assessing expected credit loss, the Company considers reasonable and well-founded information on past matters, present conditions and forecast of future economic conditions, sets the risk of default as

the weight, and calculates the weighted amount of the difference of present value between the cash flow according to the contract and the cash flow expected to be gained in practice.

On each balance sheet date, the Company calculates expected credit loss for financial instruments at different stages. If the credit risk of financial instrument hasn't substantially increased since the initial recognition, then it is in the first stage, and the Company will measure the loss provision at the amount equivalent to the expected credit loss for the next 12 months. If the credit risk has substantially increased since the initial recognition without credit impairment, then the financial instrument is in the second stage, and the Company will measure the loss provision at the amount equivalent to the expected credit loss for the entire duration. If credit impairment has occurred since the initial recognition, then the financial instrument is in the third stage, and the Company will measure the loss provision by the amount equivalent to the expected credit loss for the entire duration.

For financial instruments featuring relatively low credit risk on asset balance date, the Company assumes no substantial increase of credit risk since the initial recognition, and will measure the loss provision at the amount equivalent to the expected credit loss for the next 12 months.

For financial instruments that are in the first stage or second stage, or featuring relatively low credit risk, the Company will calculate the interest income according to the book balance and the effective interest rate without deducting provision. For financial instruments that are in the third stage, the Company will calculate the interest income according to the amortization cost and the effective interest rate, deducting provision from the book balance.

For notes receivable and accounts receivable formed in daily operations like sale of product and provision of labor, regardless of substantial financing component, the Company will measure the loss provision by the amount equivalent to the expected credit loss for the entire duration

When the information about the expected credit loss of a single financial asset cannot be evaluated at a reasonable cost, the Company shall divide the accounts receivables portfolio according to credit risk characteristics and measure the expected credit loss based on portfolios. The foundation to determine portfolio and provision means are as follow:

Bank acceptances portfolios Bank acceptances

Accounts receivable portfolios Accounts receivable of related party within range of merge

Other accounts retrievable portfolios
Other accounts retrievable portfolios
Other accounts retrievable portfolios
Other accounts retrievable with lower credit risk (e.g. advances to employees, deposit, security fund)

Other accounts retrievable of related party within range of merge

Other portfolios Other accounts apart from above portfolios

For accounts retrievable divided as portfolio and accounts retrievable formed in daily operations like sale of product and provision of labor, the Company calculates the expected credit loss through the comparative table of accounts retrievable and accounts retrievable age and the expected credit loss rate over the entire duration based on the current situation and prediction of future economic situation consulting historical credit loss experience. For other notes retrievable and accounts retrievable classified as portfolio, the company will calculate the expected credit loss through the exposure at default and expected credit loss rate for the following 12 months or over the entire duration based on the current situation and prediction of future economic situation consulting historical credit loss experience.

The Company calculates provision withdrawn or reversed into profits/ losses of the current period. For liability instruments in fair value whose changes are included in other comprehensive profits, the Company calculates impairment losses or income into profits/ losses of the current period, while adjusting other comprehensive profits.

(6) Transfer of financial assets

If almost all the risks and rewards in respect of the ownership of the financial asset are transferred, the financial asset shall be derecognized; if they are retained, the financial asset shall not be derecognized.

If almost all the risks and rewards in respect of the ownership of the financial asset are neither transferred nor retained, the Company will conduct further evaluation: If the enterprise does not retain control over the asset, then its financial assets shall be derecognized, and the rights and obligations produced or retained during transfer shall be separately recognized as assets or liabilities. If the enterprise retains control over the asset, then relevant financial assets shall be recognized according to the degree to which it continues to be involved in the transferred financial assets, and relevant liabilities shall be recognized.

If the enterprise continues to involve itself by obligation of guarantee for transferred financial assets, then the lower one of the book value and guarantee amount of financial assets on transfer date shall be selected and recognized as the transferred financial assets. The relevant liabilities are determined as the sum of guarantee amount and fair value of guarantee contract (usually the consideration received from obligation of guarantee). The guarantee amount refers to the highest amount repayable among the considerations an enterprise receives.

5.10 Inventory

 $\sqrt{\text{applicable}} \quad \Box N/A$

(1) Classification of inventory

Inventories are classified as: raw materials, semi-finished goods, goods in progress, finished goods, and revolving materials.

(2) Measurement method of dispatched inventories

The planned cost is used for daily accounting of raw materials, and the difference of material cost should be carried forward on a monthly basis to adjust the dispatch cost into the actual cost. The semi-finished goods and finished goods shall be accounted according to the actual cost, and the moving weighted average method shall be used in accounting for costs of sales.

(3) Basis to determine net realizable values of inventories and method of write-down of inventories

At the end of the period, inventory is measured according to the lower of cost and net realizable value. The difference between cost of one inventory and net realizable value is higher than the write-down of inventories.

(4) Inventory system

The Company adopts perpetual inventory system

(5) Amortization method of low-cost consumables and packing materials

One-time amortization method is adopted.

5.11 Long-term equity investment

 $\sqrt{\text{applicable}} \quad \Box N/A$

(1) (1) Judgment criteria of control and significant influence

The majority of long-term equity investments of the Company are investments to subsidiaries. Subsidiaries refer to invested parties upon which the Company can exert control. Control refers to the fact that the investing party has power over the invested party, enjoys variable returns and can influence the return amount by exercising power over the invested party. The term 'significant influence' refers to the power to participate in decision-making on the financial and operating policies of the investee, but with no control or joint control over the formulation of these policies.

(2) Determination of the investment cost

A. Long-term equity investments resulting from combination

For business combination under common control, for the long-term equity investments obtained by cash paid, non-monetary assets paid or assumed liabilities as consideration by the acquirer, on the merger date, the initial investment cost of long-term equity investment shall be taken as the share of the owner's equity of the investee in the book value of the final control party's consolidated financial statements. According to the margin amount between initial investment cost and cash payment, non-monetary asset paid or assumed liabilities, capital reserve should be written down. If the capital reserve is not sufficient to be written down, then the retained earnings shall be written down. For investments obtained by equity securities issued by the acquirer, on the merger date, the initial investment cost of long-term equity investment shall be taken as the share of the owner's equity of the investee in the book value of the final control party's consolidated financial statements. Setting total book value of issued shares as share capital, according to the difference between the initial investment cost and total book value of issued shares, capital reserve shall be written down; if the capital reserve is not sufficient to be written down, then the retained earnings shall be written down.

For business combination not under common control, on the merger date, the combination cost according to 'Business Accounting Norms No.20- Business combinations' should be calculated as the initial investment cost of long-term equity investment.

B. Other long-term equity investments not resulting from combination

For the long-term equity investments obtained by cash paid, the Company recognizes their fair value as the initial investment costs. For the long-term equity investments acquired by the issue of equity securities, the initial investment cost shall be the fair value of the equity securities issued.

(3) Subsequent measurement and recognition of profits and losses

The investments of subsidiaries are measured with the cost method, and shall be adjusted according to equity law according to initial investment cost when making the combination financial statements. Costs shall be added or retrieved in adjustment of long-term equity investments. The cash dividends or profits declared by the investee shall be recognized as the investment income of the current period.

For long-term equity investments measured under the equity method, if the initial investment costs are higher than the investor's attributable share of the fair value of the investee's identifiable net assets, initial investment cost shall be calculated as long-term equity investment cost; if the initial investment costs are lower than the investor's attributable share of the fair value of the investee's identifiable net assets, the margin shall be calculated into profits/ losses of the current period, and long-term equity investment cost shall be increased. The Company shall, according to the shares of net profits and other comprehensive income realized by the investee that shall be enjoyed or borne by the Company, recognize the profit and loss on the investments of the current period. When recognizing the net losses of the invested party, the losses should be limited to zero at least according to book value and other long-term equities of long-term equity investment. Nonetheless, if the Company bears the obligation for additional losses and meets conditions to recognize expected liabilities, then it shall continue to recognize investment losses and calculate it into liabilities. When recognizing the net profits and losses and other comprehensive income of the investee that the Company shall enjoy or bear, the Company shall calculate the part is enjoys or bears according to share-holding ratio on the basis that the Company's share-holding ratio remains the same, and include the part directly into share-holders' equities, and make adjustments to book value of long-term equity investments. For the part of the interest or dividend from the invested party that is favorable for declaration and distribution, the book value of long-term equity investments shall be reduced accordingly. For unachieved internal transaction profits and losses between the Company and the invested party, the part of the Company shall be calculated according to the ratio that should be shared or born by the company and be offset, on the basis of which the recognition of investment profits/ losses shall be conducted. The part of asset impairment incurred in internal transaction loss shall not be offset.

5.12 Investment property

(1) When adopting cost model:

Method of depreciation or amortization

The company shall deduct expected net residual value (residual value rate: 5%) and cumulative impairment provision from the cost of investment property, and conduct depreciation or amortization using straight-line method within the service life (20 years).

5.13Fixed assets

(1) Recognition of fixed assets

√applicable □non-applicable

Fixed assets refer to tangible assets with relatively high unit value, which are held for the purpose of producing commodities, providing services, renting or business management with useful life exceeding one accounting year.

(2) Method of depreciation

√applicable □non-applicable

Catagory	Depreciation	Estimated useful	Residual value	Annual
Category	method	life (Year)	rate	depreciation rate
Buildings	Straight-line	20	5%	4.75%
	method			
Machinery and	Straight-line	10	5%	9.5%
equipment	method			
Electronic	Straight-line	5	5%	19%
equipment and	method			
others				
Vehicles	Straight-line	5	5%	19%
	method			

- A. After January 1st, 2014, the amount less than CNY 1,000,000 spent on newly-purchased equipment and apparatus for the special use of R&D shall be calculated into cost of the current period.
- B. After January 1st, 2014, the amount more than CNY 1,000,000 spent on newly-purchased equipment and apparatus for the special use of R&D, shall be depreciated according to the following table:

Asset category	Estimated useful life (Year)
Machine equipment	6 years
Electronic equipment	2 years

(3) (3) Method of impairment test and provision for impairment for fixed assets

At the end of the period, check on fixed assets shall be implemented item by item. If the recoverable amount is lower than book value because of outdated technology, impairment or long-term idle condition, the Company shall calculate the difference between recoverable amount and book value as the provision for impairment for fixed assets. Provision for impairment for fixed assets shall be conducted in terms of individual asset.

5.14 Construction in progress

 $\sqrt{\text{Applicable }} \square N/A$

Accounting method for construction in progress: each construction in progress is initially measured at the actual cost.

- (1) The construction in progress shall be transferred to fixed assets in the following conditions:
- A. The acquired fixed assets are ready for use;
- B. The physical construction of the construction in progress has been completed or substantially completed;
- C. The acquired fixed assets conform to the design requirements or contract requirements, they can be used normally, and it needs little or no expenditure on the acquired construction in progress.

- (2) The new construction, reconstruction and expansion projects of the company's fixed assets are included in the construction in progress according to the actual expenditure incurred. Borrowing interest and foreign exchange gains and losses incurred in the construction of borrowed loans can be capitalized and included in the cost of construction in progress before the fixed assets reach the intended usable state if the fixed assets meet the capitalization conditions.
- (3) On the balance sheet date, the construction in progress shall be checked by items. If there is evidence that the construction in progress is impaired, the provision for impairment shall be made based on the difference between the recoverable amount and the carrying amount.

The main factors in making provision for impairment of construction in progress are as follows:

- A. Suspended construction for a long time and is not expected to restart construction in the next three years:
- B. The constructed projects are backward in terms of technology and performance, and it is uncertain for the economic benefits brought to the enterprise;
- C. Other circumstances sufficient to prove that the construction in progress has been impaired.

5.15 Borrowing costs

 $\sqrt{\text{Applicable }} \square N/A$

The principle to confirm the capitalization of borrowing costs is as follows: the borrowing costs such as interest on borrowings, amortization of discounts or premiums, auxiliary costs, and exchange differences due to foreign currencies incurred by the Company due to borrowings, which can be directly attributed to the acquisition & construction or production of assets that meet the capitalization conditions, shall be capitalized and included in the cost of the asset; other borrowing costs shall be recognized as expenses in the period in which they are incurred and included in profit or loss.

Determination method of capitalization period:

- (1) Begin capitalization: borrowing costs can only begin to be capitalized if the following three conditions are all met simultaneously
- A. Asset expenditure has occurred;
- B. The borrowing costs have been incurred;
- C. The acquisition & construction or production activities to make the asset ready for its intended use or sale have begun.
- (2) Suspension of capitalization: if the acquisition and construction of fixed assets is suspended abnormally, and the suspension lasts for more than 3 months, the capitalization of borrowing costs will be suspended, and the borrowing costs incurred during the interruption period will be recognized as current expenses until the assets are acquisition and construction activities resumed.
- (3) Stop capitalization: when the acquired and constructed fixed assets reach the intended usable state, stop the capitalization of borrowing costs.

The calculation method of the capitalized amount of borrowing costs:

- A. If a special loan is borrowed for the acquisition, construction or production of assets that meet the capitalization conditions, the interest expense actually incurred in the current period of the special loan shall be determined after deduction of the interest income obtained by depositing the unused loan funds in the bank or by temporary investment;
- B. If general borrowings are occupied for the purpose of acquisition, construction or production of assets that meet the capitalization conditions, the Company shall calculate and determine amount of interest of general borrowings to be capitalized based on weighted average number of asset expenditures over which the accumulated asset expenditure exceeds the special borrowings multiplied by the

capitalization rate of the occupied general borrowings. The capitalization rate is calculated based on the weighted average rate of borrowings, and the auxiliary expenses incurred by general borrowings shall not be capitalized.

5.16 Intangible assets

(1) Valuation method, service life, impairment test $\sqrt{Applicable} \square N/A$

A. Pricing of intangible assets: intangible assets are initially measured at the cost when they are actually acquired. For the intangible assets developed by the Company, the expenditures in the research stage shall be included in the current profit and loss when incurred; the expenditures in the development stage shall be recognized as intangible assets (patented technology and non-patented technology) if the following conditions are all met simultaneously:

- a. It is technically feasible to complete the intangible asset so that it can be used or sold;
- b. There is intention to complete the intangible asset for use or sales.
- c. The usefulness of methods for intangible assets to generate economic benefits include that there is a potential market for the products manufactured by applying the intangible assets or that there is a potential market for the intangible assets themselves;
- d. It is able to finish the development of the intangible assets, and able to use or sell the intangible assets, with the support of sufficient technologies, financial resources and other resources.
- e. The expenditure attributable to the intangible asset during its development phase can be measured reliably.
- B. Amortization of intangible assets: The intangible assets are amortized in the straight-line method over the beneficial years from the month of acquisition, and intangible assets with indefinite useful lives are not amortized.
- C. On the balance sheet date, each intangible asset should be checked, and if there is any sign of impairment, an impairment provision should be made based on the difference between the recoverable amount and the carrying amount.
- (2). Accounting policy for internal research and development expenditures $\Box Applicable \ \sqrt{N/A}$

5.17 Long-term prepaid expenses

 $\sqrt{\text{Applicable }} \square N/A$

Long-term prepaid expenses are expenses that have occurred but should be borne by the current and subsequent periods for a period of more than one year.

5.18 Employee benefits

The Company's employee benefits refer to various forms of remuneration and compensation given by the Company to the employees for obtaining services provided by employees or for termination of labor relations, including short-term benefits, post-employment benefits, termination benefits and other long-term employee benefits. The benefits provided by the Company to employees' spouses, children, dependents, survivors of deceased employees and other beneficiaries also belong to employee benefits.

(1) Accounting treatment of short-term benefits $\sqrt{Applicable} \ \Box N/A$

Short-term benefits are the benefits that the Company expects to pay in full within 12 months after the end of the annual reporting period in which the employee provides relevant services, excluding the compensation for the employment termination. The Company's short-term remuneration specifically includes: employee wages, bonuses, allowances and subsidies, employee welfare expenses, social insurance premiums such as medical insurance premiums, work-related injury insurance premiums and

maternity insurance premiums, housing provident fund, labor union funds and employee education funds, short-term paid absences, short-term profit-sharing plans, non-monetary benefits, and other short-term benefits.

During the accounting period in which the employees provide services, the Company recognizes the actual short-term benefits as liabilities, and includes the current profits and losses or relevant asset costs according to the beneficiaries of the services provided by the employees. Non-monetary short-term benefits shall be measured at fair value.

(2) Accounting treatment of post-employment benefits $\sqrt{Applicable} \ \Box N/A$

Post-employment benefits refer to various forms of benefits provided by the Company in order to obtain the services provided by the employees after the employees retire or terminate the labor relationship with the enterprise.

Defined contribution plan: The contributions to be paid to a separate entity in exchange for the services provided by employees during the accounting period on the balance sheet date are recognized as employee compensation liabilities, and are included in the current profit and loss or related asset costs.

(3) Accounting treatment of termination benefits $\sqrt{Applicable} \square N/A$

Employee benefits liabilities shall be recognized and included into profit or loss for the current period on the earlier date of the two following circumstances:

- a. When the Company is not able to withdraw the benefits from termination of employment or resignation persuasion unilaterally;
- b. When the Company recognizes costs and fees relevant to reforming the termination benefits payment.
- (4) Accounting treatment method of other long-term employee benefits \Box Applicable $\sqrt{N/A}$

5.19 Revenue

(1) Accounting policies adopted for revenue recognition and measurement $\sqrt{Applicable} \ \Box N/A$

Revenue refers to the total inflow of economic benefits that are formed in the daily activities of the Company and will lead to an increase in owners' equity and have nothing to do with the capital invested by the owners.

When the Company has fulfilled its performance obligations in the contract, that is, recognized the Revenue when the customer obtains control over the relevant commodities, which means that the customer is able to dominate the use of the commodity and obtain almost all economic benefits from it. After the Company delivers the product to the customer as agreed in the contract, the Revenue is recognized based on the net amount after deducting the consideration payable to the customer. The Company recognizes the amount of contract consideration that has been collected from the customer as a contract liability before entering into a contract with the customer, having received the order but not delivering the product to the customer.

(2) Differences in accounting policies for Revenue recognition due to the adoption of different business models for similar businesses $\Box Applicable \sqrt{N/A}$

5.20 Government grants

 $\sqrt{\text{Applicable }} \square N/A$

Government grants refer to the monetary or non-monetary assets that the Company obtains from the government for free, but does not include the capital invested by the government as the owner of the Company. Government grants are divided into asset-related government grants and income-related government grants. Government grants can only be confirmed if they meet the following conditions at the same time:

- (1) Judgment basis and accounting treatment method of government grants related to assets Government grants related to assets shall be written off against the carrying amount of related assets or recognized as deferred income. If government grants related to assets are recognized as deferred income, they shall be included in profit or loss in stages within the useful life of the relevant assets in a reasonable and systematic manner. Government grants measured at the nominal amount are directly included in the current profit and loss. If the relevant assets are sold, transferred, scrapped or damaged before the end of their useful life, the undistributed balance of relevant deferred income shall be transferred to the profit and loss of the current period of asset disposal.
- (2) Judgment basis and accounting treatment method of government grants related to income Government grants related to income shall be dealt with according to the following circumstances:

 A. If it is used to compensate the Company's relevant expenses or losses in future periods, it should be recognized as deferred income and included into the current profit and loss or written off of the related costs when the relevant expenses, losses are recognized;
- B. If it is used to compensate the Company's relevant expenses or losses incurred, it is directly included into the current profit and loss or written off of the related costs.
- (3) Government grants related to the daily activities of the Company shall be included in other income or written off relevant costs according to the nature of economic business. Government grants unrelated to the daily activities of the Company shall be included in non-operating income and expenditure.

5.21 Deferred tax assets/Deferred tax liabilities

 $\sqrt{\text{Applicable }} \square N/A$

On the balance sheet date, according to the deductible temporary differences and taxable temporary differences of asset and liability items, the applicable tax rate is used to calculate the amount of deferred tax assets and deferred tax liabilities.

5.22 Lease

- (1) Accounting treatment of operating lease \Box Applicable $\sqrt{N/A}$
- (2) Accounting treatment of financial lease

 \Box Applicable $\sqrt{N/A}$

(3) Determination and accounting treatment of lease under the new lease standards $\sqrt{Applicable} \ \Box N/A$

A. As the lessee

On the contract start date, the Company evaluates whether the contract is a lease or includes a lease. If one party in the contract transfers the right to control the use of one or more identified assets within a certain period in exchange for consideration, the contract is a lease or includes a lease. In order to determine whether the contract transfers the right to control the use of the identified asset for a certain period, the Company evaluates whether the customer in the contract is entitled to receive substantially all the economic benefits arising from the use of the identified asset during the period of use, and has the right to dominate the use of the identified asset during the period of use. The general accounting treatment is as follows:

On the commencement date of the lease term, the Company recognizes its right to use the leased asset during the lease term as a right-of-use asset, including the initial measurement amount of the lease liabilities; for the lease payments paid on or before the commencement date of the lease term, if there is a lease incentive, the following items should be deducted, including the relevant amount of the lease incentive that has been enjoyed, the initial direct expenses incurred by the lessee, and the costs of the lessee for dismantling and removing the leased asset, restoring the site where the leased asset is located, or restoring the leased asset to the state agreed in the lease terms.

On the commencement date of the lease term, the Company recognizes the present value of unpaid lease payments as lease liabilities, excluding short-term lease and low-value assets lease. When calculating the present value of lease payments, the Company takes the interest rate implicit in the lease as the discount rate; if the interest rate implicit in the lease cannot be determined, the incremental borrowing rate of the lessee is used as the discount rate.

The Company subsequently adopts the straight-line method to depreciate the right-of-use assets, calculates the interest expenses of the lease liabilities in each period of the lease term, and includes them in the current profit and loss, unless otherwise stipulated to be included in the cost of the relevant assets. Variable lease payments that are not included in the measurement of lease liabilities are included in the current profit and loss when they are actually incurred, unless otherwise stipulated to be included in the cost of the relevant asset.

The Company does not recognize right-of-use assets and lease liabilities for short-term lease and low-value asset lease. In each period of the lease term, it is included in the relevant asset cost or current profit and loss on a straight-line basis.

B. As the lessor

As a lessor, a financial lease refers to substantially transfer almost all the risks and rewards related to the ownership of the leased asset on the lease commencement date, and all other leases are operating leases.

- a. Rental income from operating leases is recognized as current profit and loss on a straight-line basis over each period of the lease term.
- b. On the start date of the lease term, the Company recognizes the finance lease receivables for the finance lease, and derecognizes the finance lease assets. During the initial measurement of the finance lease receivables, the net investment in the lease is taken as the entry value of the finance lease receivables. The net lease investment is the sum of the unguaranteed residual value and the present value of the lease receipts not yet received at the commencement date of the lease term which is discounted at the interest rate implicit in the lease.

5.23 Changes in significant accounting policies and accounting estimates

(1) Changes in significant accounting policies

 $\sqrt{\text{Applicable }} \square N/A$

The Ministry of Finance revised and issued *Accounting Standards for Business Enterprises No. 21 - Leases* (hereinafter referred to as *New Lease Standards*) in December 2018. The Company will implement and follow the new lease standards from January 1, 2021. No adjustment will be made to the comparative financial statements, and the above accounting policies have been approved by the Company's board of directors.

When measuring the lease liability, the Company discounts the lease payments at the incremental borrowing rate at 1 January 2021.

Unit: CNV

	Ont. Civi
Undiscounted amount of operating lease commitments on	639,664,840.54
January 1, 2021	
Incremental borrowing rate on January 1, 2021	3.20%-3.40%
Lease liabilities discounted at the incremental borrowing rate	536,281,365.04

on January 1, 2021	
including: lease liabilities due within one year	121,378,096.65
Lease liabilities due over one year	414,903,268.39

Please refer to this section for the changes in the corresponding accounting statement items: V. Significant accounting policies and accounting estimates; 23. Changes in significant accounting policies and accounting estimates; (3) Adjustments to the financial statements at the beginning of the execution year of any new standard governing leases from 2021.

- (2) Changes in significant accounting estimates \Box Applicable $\sqrt{N/A}$
- (3) Adjustments to the financial statements at the beginning of the execution year of any new standard governing leases from 2021

Adjustment of each item:

The Ministry of Finance revised and issued *Accounting Standards for Business Enterprises No. 21 - Leases* (Cai Kuai (2018) No. 35) in December 2018. The Company will implement and follow the new lease standards from January 1, 2021. The Company separately lists the right-of-use assets and lease liabilities in the balance sheet in accordance with the provisions of the new standard. According to the linking regulations, the enterprise that implements this new standard for the first time shall adjust the amount of retained earnings at the beginning of the period and other relevant items in the financial statements according to the cumulative impact of the first implementation of this new standard, and not adjust the comparative financial data.

Adjustment of each item:

The Ministry of Finance revised and issued Accounting Standards for Business Enterprises No. 21 - Leases (Cai Kuai (2018) No. 35) in December 2018. The Company will implement and follow the new lease standards from January 1, 2021. The Company separately lists the right-of-use assets and lease liabilities in the balance sheet in accordance with the provisions of the new standard. According to the linking regulations, the enterprise that implements this new standard for the first time shall adjust the amount of retained earnings at the beginning of the period and other relevant items in the financial statements according to the cumulative impact of the first implementation of this new standard, and not adjust the comparative financial data.

9. Risks relevant to financial instruments

 $\sqrt{\text{Applicable }} \square N/A$

The main financial instruments of the Company include other non-current financial assets, cash and cash equivalents etc. These financial instruments are created mainly for the operating financing of the Company. The Company has many other financial assets and liabilities, such as accounts receivable, other receivables, accounts payable and other payables, which are directly produced as a result of operation.

The major risks caused by the financial instruments of the Company are credit risk, liquidity risk, exchange rate risk and interest rate risk.

9.1 Credit risk

The financial assets of the Company include cash and cash equivalents, accounts receivable, other receivables etc. The credit risk in these financial assets originates from breach of the agreement by the counter party. The maximum risk exposure is equivalent to the carrying amount of these instrument.

No guaranty is required as the Company only trades with the recognized and reputable third parties. The credit risk is managed by customers in a centralized manner. The Company faces a low credit risk as it collects accounts in advance during sales.

9.2 Liquidity risk

Liquidity risk refers to the risk of shortage of funds when the enterprise performs its obligation of settlement through delivery of cash or other financial assets.

The policy of the Company is to ensure that it has sufficient cash to repay the debts due. The subsidiaries shall be responsible for their own cash flow predictions. The finance department of the Company shall constantly monitor the short-term and long-term funds demands at the group level to maintain the fund demands according to the summary of the cash flow predictions of the subsidiaries.

9.3 Exchange rate risk

The foreign exchange fluctuation risk faced by the Company is mainly related to the operating activities of the Company (when the receipts and payments are not settled in a foreign currency other than the functional currency of the Company) and its net investment in overseas subsidiaries. The foreign exchange risk sustained by the Company is mainly related to the United States dollars and Euro. The Company's major business activities are priced and settled in CNY except for those settled in USD and EUR.

9.4 Interest rate risk

Interest rate risk refers to the risk of fluctuation in the fair value of the financial instruments or the future cash flow due to the change in the market interest rate. The risk of fluctuation in the market interest rate faced by the Company is mainly related to the liabilities with the interest accrued at a floating interest rate. As at December 31, 2021, the Company has no liabilities with the interest accrued at a floating interest rate.

10. Disclosure of fair value

10.1 Fair value of assets and liabilities measured at fair value at the end of the period $\sqrt{Applicable} \ \Box N/A$

10.2 The basis for determining the market price of continuous and non-continuous level 1 fair value measurement items
